Description:	Sulphur Dioxide released on 1/31/00 at 1247am - 1114 am, in amount of 1019Lbs. Nitrous Oxide was also released at this time in amount of 75Lbs. Second incident started on 2/1/00 thru present but the only numbers they have are 4783 Lbs of Sulphur Diooxide. They have no results yet from the Nitrous Oxide as they have not yet received the results from an outside laboratory. There is still a continuous release off and on at this time. There is no immediate hazard to life or property but it exceeds their reportable quantity. This is from an elevated flare.

Description:	The releases are combustible flare gasses and represent the upper value of the releases, however, the average release per day is much lower. Chevron has just became aware the magnitude of the daily releases and are taking steps to mitigate the realleases. These are continuous releases and are being reported as per CERCLA code 40 CFR sec 302.8. Previuous spills called in invovling this incident are 99-4287, 00-1847, 00-1866.

Description:	An unknown amount was released but they believe it may have exceeded the 10 pound quantity. The release was the result of a compressor shut down with a plugged discharge line, this diverted the nitric oxide to the flare. The compressor is shut dowwn, they are cleaning with discharge line with hot water and steam. They anticipate this will go

Description:	Unknown cause of release. Contained to the mechanical control room but still releasing. Coming thru vent on the roof. Building was evacuated prior to Fire's arrival. Parking lot has also been cleared and for at least 1 mile down wind. This is ann industrial area, not residential. Unknown if a Hazmat Level A team will be called out or not. One report of a gentleman with headache and dizziness but he left city. The number evacuated is an estimate only.
